8h

Program

11:00 AM to 7:00 PM

~1,000

Attendees

Across the day

Built Around the People Moving the Digital Market Forward

TrafficMENA is a community-led professional platform connecting founders, marketers, operators, specialists, practitioners and companies across Digital Marketing, E-commerce, AI and Growth

We create practical learning experiences, structured learning tracks, workshops, professional gatherings, community events and industry-focused content built around the realities of the market

What started as a local professional meetup community in Egypt has evolved into a wider platform connecting thousands of professionals across MENA

Community-Led

We build relationships that continue beyond individual events and sessions

Operator-First

Our content is built around people actively working, building and making decisions in the market

MENA-Relevant

Our conversations reflect the realities of Egypt and the wider region rather than relying on generic global playbooks

Multi-Format

Our community learns and connects through online and offline tracks, sessions, workshops, events and content

A Community Built Through Consistency

Thousands of professionals. Hundreds of hours of learning. One continuously growing professional community.

More Than an Audience

TrafficMENA brings together professionals working across different layers of the digital economy

Founders & Business Owners

Entrepreneurs and decision-makers building and growing businesses

Marketing & Growth Leaders

Professionals responsible for acquisition, strategy, performance and commercial growth

Digital Specialists

Brings together professionals across Performance Marketing, SEO, Content, Copywriting, Analytics, CRO, Product, CRM and AI.

E-commerce Professionals

Includes E-commerce Managers, Store Operators, Operations Teams, Customer Experience professionals, Retention specialists and Fulfillment teams.

Agencies & Independent Professionals

A network of Agency Owners, Consultants, Freelancers and Service Providers building, advising and growing businesses across the market

Technology & Business Enablers

A network of SaaS, MarTech, AI, platform and technology companies powering digital business growth.

Different roles. Different disciplines. One connected professional ecosystem.

Market Context & Objectives

While the e-commerce market continues to expand rapidly across the MENA region, vendors and decision-makers remain fragmented.

Founders constantly strive to acquire customers more efficiently, while marketing teams face escalating acquisition costs, fulfillment hurdles, COD complexities, inventory management and retention challenges.

Meanwhile, technology and service providers are seeking direct, effective channels to connect with these fast-growing businesses.

About TrafficMENA

TrafficMENA maintains a verified database of 3,000+ registered decision-makers with direct email and WhatsApp reach. The wider audience encompasses over 10,000+ combined social media followers across channels.
